

Neoappz Introduces Instant Translator 1.0 for iOS

Published on 10/19/15

Mobile application development company, Neoappz today introduces Instant Translator 1.0, their new app for iOS devices. Instant Translator is a useful app which translates words to another language as they are spoken. It allows users to have a voice or text conversation with a person who do not speak their language. The app supports over 90 languages. Instant Translator also has a multi device communication feature which allows users to communicate using two devices.

Colombo, Sri Lanka - Neoappz, a mobile application development company, today is proud to announced the release and immediate availability of Instant Translator 1.0 for iOS devices. Instant Translator is a user-friendly application which allows users to communicate with people who do not speak their language. The app supports over 90 languages and is helpful while traveling and also in day-today activities.

Instant Translator's Voice-to-Voice feature allows users to instantly speak another language. Users can speak to the app to get their words instantly translated to another language. With the Text-to-Text feature of the app users can type or copy text from emails, messages etc and get them instantly translated to more than 90 languages. The app has an auto speak option which automatically speaks out the translations. Users can also listen to translations by shaking the device or tapping on the play button. Translations can be shared via email, messages and social media.

Instant Translator supports 99 languages for text-to-text translation, 37 languages for speech-to-speech translation and 41 languages for text-to-speech translation. The app is localized in English, Chinese, German, Korean, Japanese, French and Spanish.

The Multi Device Communication feature allows users to connect devices using bluetooth or wifi and have a voice or text conversation.

Device Requirements:

- * Compatible with iPhone, iPad and iPod touch.
- * Requires iOS 7.0 or later
- * 5.06 MB
